Our Vision:

Through the six stages, influencing the global market to become a prominent and integral service provider of Renewable Energy.

Our Values:

- Ethical service
- Transparent with clients
- Adding values through training.
- Adhering to safety practices.
- Keeping like-minded and dedicated people in the organization
- Adapting the technology upgradation.

Quality Policy:

We are committed to high standard of customer satisfaction and strive for continual improvement in our overall processes to ensure sustained and consistent quality of our products and value-added services. This organization is committed to meet all customer, legal and any other applicable requirements.

Seeing and seizing opportunities

Every wind turbine project comes with its share of challenges relating to development, implementation and management and requires specific know – how to make sure the process runs smoothly.

We have more than 15 years formally known as(AWT Energy Pvt Ltd) of experience in seeing and exploring the opportunities – and turning wind projects into value. Your project could be next.

Our core competencies

We have defined our know-how in three core competencies:

- Greenfield.
- Project Services.
- Technical & Commercial Management (TCM).

No matter what level your project is, At windplus we guarantee a professional and knowledge-driven approach. Our competencies form a solid foundation that has proven to provide solutions with return on investment.

Our clients

Greenfield

The term “Greenfield” refers to the early-stage development of a wind park, which is a quite challenging phase.

Suitable or proposed areas for development of wind projects are investigated, with the aim of assessing the feasibility of a project. Feasibility studies cover the following areas: wind, grid connection, roads, soil conditions and the environment.

The initial phase of Greenfield typically leads to firm agreements with the landowners, a preliminary commitment on final grid connection and the authority’s acknowledgement of the location of the project.

The next step in Greenfield is project design and authorizations. This stage of Greenfield last until all required permits for the implementation and operation of the wind turbine project are in place, not least the crucial building permit, making the project ready-to build.

- Up to date knowledge of the market.
- Selection and evaluation of potential locations.
- Project design and authorizations.

Project Services

Our Project Services cover a wide field of special areas including EPC Management, Project Development Assistance on insourced basis and different kinds of Customized Assistance. All Project Services will be tailor-made according to the needs in the specific project.

Within EPC Management we offer a palette of elements ensuring a smooth efficient development process all the way through pre-construction, construction and commissioning.

The Project Development are based on our great experience and structured on the needs and wishes of the customer. We offer to assist project developers in completing and optimizing the development of projects with the aim of increasing bankability and business case.

We offer a wide palette of flexible Customized Assistance. You can choose one – Or you can mix and match. Through an open dialogue we help identify the key areas where our assistance – experience and knowhow – can make positive difference to your wind power project.

- EPC Management
- Project Development Assistance
- Customized Assistance
- Project evaluation
- Due diligence coordination
- Sales preparation
- Tendering and contract negotiation

Technical & Commercial Management

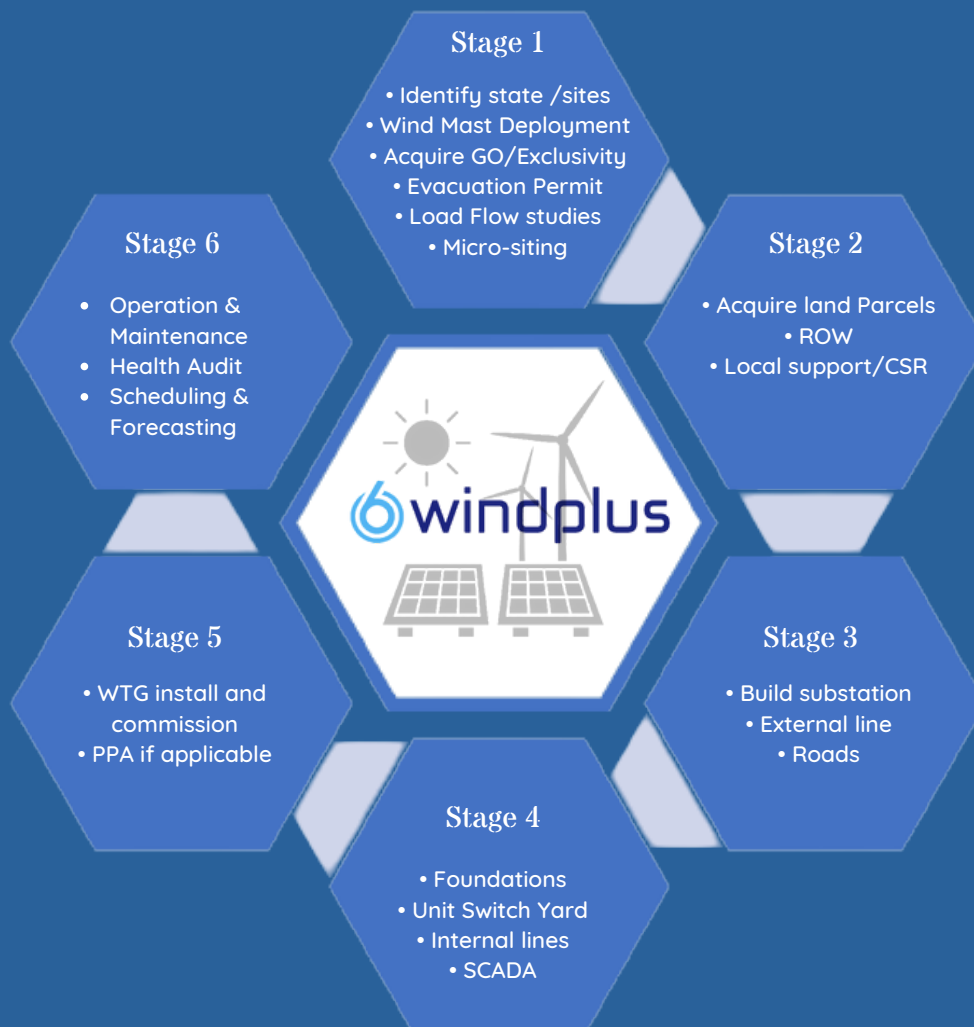

The Technical, Commercial and Financial Management are demanding fields of work in terms of competencies and resources. We have years of experience in the trustworthy daily management of wind farms, including the management of investor companies which consists of ongoing dialogues with all related stakeholders; land owners, local authorities, grid operators, etc.

We offer a flexible setup and through dialogue we find the best management approach to your project.

The most important functions within commercial and financial management can be summarized as:

- Management service
- Coordination & communication
- Contract management and market know-how
- Basic financial management
- MIS Reporting

We have mastered the 6 stages of renewable energy project

At Windplus Pvt Ltd national borders are no limit, just as it isn't for the wind. Many good projects have started with a good talk.
